FRESHWATER SCIENCES (SCHOOL OF)

With a degree in freshwater sciences or atmospheric sciences, students can turn their passion for the environment into a fulfilling career. The School of Freshwater Sciences offers bachelor’s, master’s and doctoral degrees in freshwater and atmospheric sciences. These programs offer an interdisciplinary approach to training the next generation of scientists armed with the knowledge, skills, and experience to anticipate and address the environmental issues of the future.

Areas of study include:

- Freshwater Policy and Economics
- Freshwater System Dynamics
- Freshwater Technology
- Human and Ecosystem Health
- Weather and Climate

Undergraduate degree programs combine foundational coursework with multiple hands-on experiences to prepare students for the job market. Graduate degree programs offer extensive research and internship opportunities with faculty mentorship. Freshwater Sciences students have access to state-of-the-art labs and equipment, a genomics center, and research vessels that provide opportunities to develop skills in the latest scientific techniques. Atmospheric Sciences students meet all the requirements to be employed by the National Weather Service or another federal agency as a meteorologist.
