HEALTH SCIENCES, PHD

The PhD in Health Sciences curriculum includes a set of core courses providing a comprehensive structure for doctoral education including:

- Philosophical foundations.
- Concepts and practices that contribute to students, development as teaching scholars.
- Research methods.
- A series of seminars that build students, critical thinking skills, familiarity with a range of health sciences research topics, and experience in scholarly dialogue and presentation.

Concentrations and Cross-Disciplinary Courses

In addition to the core courses, the program includes concentration and cross-disciplinary courses in areas such as disability and rehabilitation, diagnostic and biomedical sciences, human movement sciences, population health, and health administration/policy. Independent research and the dissertation will be structured according to the choice of specialization.

Admission Requirements

Application Deadlines

Application deadlines vary by program, please review the application deadline chart (http://uwm.edu/graduateschool/program-deadlines) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (https://uwm.edu/onestop/dates-and-deadlines).

Admission

To be considered for admission to the program applicants must satisfy all UWM Graduate School admission requirements in addition to the following College of Health Sciences requirements:

1. Submission of scores on the General Test portion of the Graduate Record Examination (http://uwm.edu/graduateschool/admission/#gre); test taken within last five years.

2. One of the following:
   - Master’s degree or equivalent in an area that provides foundational academic preparation in proposed Health Sciences PhD Area of Concentration (http://uwm.edu/graduateschool/health-sciences/#coconcentration).
   - Bachelor’s degree with exceptional promise, as indicated by research experience/evidence of writing or an undergraduate project, recommendations, GRE (http://uwm.edu/graduateschool/admission/#gre) scores, and undergraduate GPA.

3. A sample of the applicant’s written work that demonstrates his or her ability to conduct research and/or the ability to critically analyze the scholarly work of others.

4. A letter outlining the applicant’s academic and professional background, declaration of Area of Concentration and Major Professor as well as specific research interests and goals for the PhD program. This statement should be submitted to the Graduate School and must be complete and thorough as it provides information that is central to the admission decision. This letter will serve in lieu of the Graduate School’s “Reasons for Graduate Study” statement.

5. Three letters of recommendation from individuals familiar with the applicant’s intellectual achievement and potential. At least two of these letters must be from faculty or senior administrators at academic institutions.

For applicants from countries other than the U.S.A. whose first language is not English, a score of at least 250 on the computer-based (or 600 on the paper-based) Test of English as a Foreign Language (TOEFL) is required. A score of 6.5 on the International English Language Testing Systems (IELTS) examination will be accepted in lieu of the TOEFL.

The PhD Steering Committee will make an admission recommendation and forward it to the appropriate College of Health Sciences departmental Graduate Faculty or Executive Committee and identified Major Professor. The final admission decision is contingent upon approval by the departmental Graduate Faculty Committee or Executive Committee, the applicant’s Major Professor, and the Graduate School.

Prior to admission an eligible College of Health Sciences Graduate Faculty member must agree to serve as the applicant’s major professor.

Reapplication

A student who has received a master’s degree in Clinical Laboratory Sciences, Communication Sciences and Disorders, Kinesiology, or Occupational Therapy from the University of Wisconsin-Milwaukee must formally reapply for admission to the Graduate School before continuing studies toward the PhD degree.

Credits and Courses

The PhD program requires 72 credits beyond the Bachelor’s degree, including no more than 36 credits from a related master’s degree and/ or other post-baccalaureate coursework. A student must complete a minimum of 36 credits at UWM including dissertation credits. Precise numbers of credits and actual course requirements will be determined after review of the applicant’s previous coursework. The student plans an individual program of study in consultation with the Major Professor and Doctoral Committee that will include a set of core courses, an area of concentration, cross-disciplinary courses, electives, and the dissertation.

</table>
Area of Concentration (minimum of 9 credits)
Courses related to the area of concentration will require students to

draw upon the strengths and expertise of the faculty and curriculum in

an interdisciplinary and collaborative manner. The basis of scientific

exploration will be premised on the model adapted by the World Health

Organization (WHO) which defines three levels contributing to the

concept of health:

1. intact body structures and unimpaired host functions at the

   molecular, cellular or organ system level,
2. ability to participate in activities and roles at the level of the living

   organism or individual person, and
3. a physical and social environment that influences health at the level

   of society and populations.

Cross Disciplinary Courses (minimum of 6 credits)
Cross-disciplinary courses in areas such as disability and rehabilitation,

diagnostic and biomedical sciences, human movement sciences, and

population health and health administration/policy, will provide a unique

framework and understanding for specific health states, outcomes,

determinants, and environmental influences. Each of these specialties

reflects trends and needs in health-related fields as well as the current

expertise among faculty in CHS.

Electives (6 credits)
Elective courses relevant to the student’s program of study will be

selected from within CHS and from departments across campus. This

cross-disciplinary approach will encourage collaboration and interaction,

and provide breadth and depth to a student’s focused course of study.

Dissertation (minimum of 12 credits)
The last component of the degree requirements, independent research

and dissertation, will be structured by the choice of concentration.

The dissertation will consist of focused, independent research that

contributes to the existing body of knowledge.

Program Requirements

Residence
The student must complete at least half of the graduate credits required

for the PhD in residence at UWM in doctoral status. In addition, the

student must complete at least 8 graduate credits in each of two

consecutive semesters, or 6 or more graduate credits in each of three

consecutive semesters, exclusive of summer sessions. In exceptional

cases, modifications of the residence requirement may be requested,

subject to the approval of the College of Health Sciences PhD Steering

Committee and the Graduate School.

Foreign Language
Foreign language coursework is optional, depending upon the

recommendation of the student’s Major Professor.

Doctoral Committee
In consultation with the Major Professor, each student is responsible

for selecting a Doctoral Committee before completing 12 credits in the

doctoral program. The doctoral committee shall consist of the student’s

major professor and four other graduate faculty; three of these must

be at UWM, including at least two from CHS. The other member may be

from another institution, subject to the approval of the student’s program

executive committee. Upon formation of the Doctoral Committee,

the student must file a “Doctoral Committee” form with his/her major

professor which is to be subsequently filed with the CHS – PhD Steering

Committee.

Doctoral Preliminary Examinations
The doctoral preliminary examinations must be completed within three

years of initial enrollment in the program. Students may receive up to

two additional semesters to complete the preliminary examinations

with approval of the CHS – PhD Steering Committee. The examinations

consist of a written examination designed to demonstrate the breadth

of a student’s knowledge and the ability to conduct advanced research,

and an oral exam covering issues raised during the written exam and/

or focusing on the proposed dissertation research. The oral exam must

follow the written exam within 10 days. Students take the preliminary

examinations after completing all doctoral coursework or with no more

than three credits of doctoral coursework remaining. Students cannot

take the examinations if they have any incomplete or unreported grades

or a GPA lower than 3.0. Students who fail the preliminary examinations

may not proceed to the dissertation. The examinations may be retaken

only once.

Dissertation Proposal
Upon successful completion of the preliminary examinations, the

student submits a written dissertation proposal and delivers an oral

presentation of the proposed research to the Dissertation Committee.

The proposal takes the form of a scholarly document outlining the

problem, its background and significance, summarizing relevant literature,

and outlining the proposed research methods. It should include a

tentative timetable and outline any required resources (space, equipment,

etc.). Members of the student’s Dissertation Committee must approve

the dissertation proposal. Acceptance of the dissertation proposal

establishes an agreement between the student and the Dissertation

Committee as to the nature and scope of the research to be conducted,

and the procedure for completing the dissertation. Upon Dissertation

Committee approval, research proposals that use animal or human

subjects must receive approval from the Animal Care and Use Committee

or the Institutional Review Board.

Dissertator Status
Specific requirements which must be completed before a doctoral

student qualifies for dissertator status are described on the Graduate

School Doctoral Requirements (http://uwm.edu/graduateschool/
doctoral-requirements) page.

Dissertation
The dissertation is a major piece of original research representing a

substantial contribution to the existing body of knowledge. The original

research findings embodied in the dissertation should be acceptable

for publication in a refereed journal. The student’s Major Professor and

Dissertation Committee provide guidance in completing the dissertation.

Dissertation Defense
Once the dissertation document meets with Dissertation Committee

approval, an oral defense takes place. At the time of the defense, the

dissertation must be of publication-quality (as judged by the Dissertation

Committee). The dissertation defense will be held in an open forum

after which the Dissertation Committee will meet in closed session to

make a decision on degree conferral. The time and place of the public

presentation must be announced with adequate time (i.e., at least one

week prior to the defense) so that faculty and students may attend.

Time Limit
The student must complete all requirements for the degree within seven

years of the date of initial enrollment in the program. Upon successfully

passing the preliminary examinations, the student must complete all

requirements for the degree within four years.
