

# OCCUPATIONAL THERAPY, OTD

The Doctor of Occupational Therapy prepares students to become experts in an identified specialization area and will prepare them to become clinical leaders, translating new findings and evidence into practice. Students will develop and demonstrate more advanced knowledge and skills, beyond the master's level in an occupational therapy concentration area.

## Application Deadlines

Application deadlines vary by program, please review the application deadline chart (<http://uwm.edu/graduateschool/program-deadlines>) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (<https://uwm.edu/onestop/dates-and-deadlines>).

## Admission Requirements

Primary entry requirements are:

1. MSOT or MOT degree from an ACOTE-accredited program (or equivalent recognized by the World Federation of Occupational Therapists, WFOT).
2. Occupational therapy licensure (or international equivalent approved by WFOT). Current master's students may apply but cannot formally matriculate to the OTD program until they are licensed. Students may be provisionally admitted to the OTD program and accumulate credits toward graduation for one semester while required documentation is being prepared or approved.
3. The competitive admissions process also includes evaluation of the GPA, coursework, and professional experiences, as well as a statement of personal interests.

Practicing occupational therapists with a bachelor's degree may be admitted on a case-by-case basis. Those who are accepted to the OTD Program will be expected to complete deficiency credits that ensure that their educational background is comparable to practitioners with a master's degree, and will complete a minimum of 54 credits of graduate-level coursework at UWM.

## Credits and Courses

The OTD program requires 33 credits, including 9 credits of required occupational therapy core courses beyond the level of the MS degree and 15 credits of electives in a concentration area chosen by students and their advisors. Students who need additional background preparation may need additional credits.

Code	Title	Credits
<b>Core</b>		<b>9</b>
NURS 810	Leadership for Advanced Practice in Healthcare	
OCCTHPY 701	Advanced Measurement and Instrumentation in Health Care	
	Evidence Based Practice for Individuals & Populations <sup>1</sup>	
<b>Area of Concentration</b>		<b>15</b>
Complete a minimum of 15 credits in an area of concentration		

<b>Doctoral Project and Experiential Components <sup>1</sup></b>	<b>9</b>
<b>Total Credits</b>	<b>33</b>

<sup>1</sup> Student should meet with their faculty advisor to enroll in a specific course or courses. Curricular requests are currently in process for permanent course numbers and are expected to be approved in academic year 2019-2020.

## Area of Concentration (minimum of 15 credits)

Students work with faculty advisors to develop a statement of their proposed concentration area, their needed and desired knowledge and courses, a mentoring team, possible doctoral experience sites, and a doctoral project. Examples of potential doctoral concentrations are below.

### Assistive Technology and Assessable Design

Code	Title	Credits
EXCEDUC 765	Assistive Technology Service Delivery in Schools	
OCCTHPY 724	Advanced Design and Disability	
OCCTHPY 760	Assistive and Rehabilitation Technology	
OCCTHPY 770	Assessment in Assistive Technology and Accessible Design	
OCCTHPY 777	Fieldwork in Assistive Technology	

### Community and Behavioral Health

Code	Title	Credits
PH 702	Introduction to Biostatistics	
PH 706	Perspectives on Community & Behavioral Health	
PH 725	Theories and Models of Health Behavior	
PH 726	Community Health Assessment	
PH 728	Program Evaluation in Public Health	

## The Doctoral Experience and the Doctoral Project (minimum of 9 credits)

Students must deliver and show competence in an evidence-based or evidence-informed population-based intervention that is still individualized. Ideally, the doctoral experience will also inform the student's doctoral project. The doctoral experience may occur in one 16-week period, or it may be spread out over a greater period, if the 640-hour criterion is met. Like the MS thesis and PhD dissertations, the culminating 6-credit hour doctoral project must be written, publicly presented and defended. Up to 3 credits may be transferred, on a case-by-case basis, for UW-Milwaukee MSOT graduates whose master's thesis or project will be used as the foundation of their OTD project.

## Program Requirements

### Major Professor as Advisor

The Graduate School requires that each student have a major professor to advise, supervise, and approve the program of study. Students are assigned faculty advisors in the OTD program upon acceptance into the program.

### Time Limit

The OTD curriculum is designed to be completed in four semesters. Some students may require two or three years of combination full- and part-time

coursework, especially if they choose to work part time, take additional courses, or want to invest more time to complete their project.

Incoming OTD students with advanced applicable coursework and experience may transfer graduate credits or place out of up to 6 credits that directly relate to their proposed Program of Study. UWM MSOT students may transfer up to 3 of their master's thesis or project credits and apply those to their OTD project credits requirement. Combined, these transfers could reduce the total credits required to 24 and would likely accelerate time to completion for some students.

Because circumstances beyond a student's control may prevent completion of requirements according to this timeline, students will be granted a maximum of ten years to complete the degree.
