To prepare for post-baccalaureate study in Dietetics, students choose our BS in Nutritional Studies (http://catalog.uwm.edu/health-sciences/kinesiology/nutritional-sciences-bs). This four-year, science-intensive program will help you better understand the relationships among food, nutrients, eating behavior, wellness and human health. In addition to sharpening the scientific and technical knowledge and skills essential to nutritional sciences, you’ll develop critical thinking and professional communication skills through coursework in public speaking, statistics, business and professional writing, and courses which delve into relevant research literature. You’ll graduate with a sound base in nutrition education, health promotion and disease prevention, which will have prepared you to join the workforce or continue on to graduate school.
