

CONSERVATION AND ENVIRONMENTAL SCIENCE

The alarming rate of climate change, habitat destruction and, species extinction over the last 2 decades has catalyzed our resolve to find solutions to growing environmental problems:

- the contamination of air, water and soil;
- the spread of toxic chemicals;
- invading species driving out native populations, and
- the progressive loss of habitats that species need to grow, survive, and reproduce.

These problems are not simple; finding solutions requires the integration and interpretation of biological, chemical, geological, and social sciences.

Coursework in our undergraduate interdisciplinary program provides training in areas such as ecosystem management, natural resources conservation, environmental assessment, and environmental education.

Programs

- Conservation and Environmental Science, Minor (<https://catalog.uwm.edu/letters-science/conservation-environmental-science/conservation-environmental-science-minor/>)
- Conservation and Environmental Sciences, BA (<https://catalog.uwm.edu/letters-science/conservation-environmental-science/conservation-environmental-science-ba/>)
- Conservation and Environmental Sciences, BS (<https://catalog.uwm.edu/letters-science/conservation-environmental-science/conservation-environmental-science-bs/>)

Faculty

Name	Rank	Degree	School	Graduate Faculty	Emeritus Faculty
Glen Fredlund	Associate Professor	PhD	University of Kansas		✓
Neal T. O'Reilly	Lecturer	PhD	Marquette University		
Chris Young	Teaching Professor	PhD	University of Minnesota
