PSYCHOLOGY, MS

The Department of Psychology offers two graduate degrees: the PhD in Psychology and the MS in Psychology. Study is available in the following concentrations, which we refer to as programs.

PhD in Psychology (includes earning the MS)

- Clinical Psychology program (accredited by the American Psychological Association)
- Health Psychology program
- Neuroscience program

MS in Psychology

- Terminal Health Psychology program.

Note that the Department of Biological Sciences and several other departments also offer opportunities for doctoral study in neuroscience.

All programs train students in the facts, methodologies, and theories of psychology, with special emphasis on developing research competence. The department has well-equipped laboratories and an on-campus training clinic. The city of Milwaukee provides additional opportunities for training at hospitals, social service agencies, and the Medical College of Wisconsin.

Admission Requirements

Application Deadlines
Application deadlines vary by program, please review the application deadline chart (http://uwm.edu/graduateschool/program-deadlines) for specific programs. Other important dates and deadlines can be found by using the One Stop calendars (https://uwm.edu/onestop/dates-and-deadlines).

Admission
Application must be made to the Graduate School.

Applicants are admitted only at the beginning of each academic year. Applications must be submitted by December 1. Important: It is essential to consult the department's website for important information, including the departmental admissions brochure: http://uwm.edu/psychology/graduate/application/

An applicant must meet Graduate School (http://uwm.edu/graduateschool/admission) requirements plus the following departmental requirements to be considered for admission to the program:

1. Completion of an undergraduate major in psychology (or neuroscience).
2. Submission of scores on the General Test of the Graduate Record Examination (GRE) (http://uwm.edu/graduateschool/admission/#gre).
3. Receipt of positive recommendation by the Departmental Admissions Committee.

Admission is based on evaluation of an applicant’s entire record. In evaluating each application, the Admissions Committee examines such factors as GRE scores, grades, research record (e.g., research apprenticeships, publications, presentations, and senior or honors theses), and letters of recommendation.

Students without an undergraduate major in psychology (or neuroscience) may be considered for admission provided the following courses are completed: introductory statistics, a laboratory course in research methods of psychology, and an advanced laboratory course in psychology. Students with one of these courses are eligible to apply, but the two remaining courses would have to be completed within three semesters of enrollment. No course credits earned in making up deficiencies may be counted as program credits required for the degree. Students satisfying only this very minimal requirement should understand that additional work may be required to enroll in specific graduate-level courses.

As part of their doctoral requirements, PhD students must earn a master’s degree in psychology that includes a thesis derived from empirical research; they do this by fulfilling the requirements of the “General Psychology Track” for the MS degree while enrolled simultaneously in the PhD program. An exception is that students who already have earned a master’s degree based on an empirical thesis in psychology or neuroscience from another college or university are exempt from the requirement of earning the MS in our department.

Credits and Courses

General Psychology Track
Students in the general psychology track must be simultaneously enrolled in the doctoral program. The minimum requirement for the MS is 30 graduate credits of psychology, 24 of which must be earned in formal coursework (excluding practica) and 6 of which must be earned through an acceptable thesis.
Thesis
The student, under the direction of an advisor, must develop an acceptable thesis based on empirical research. The student must pass an oral examination in defense of the thesis.

Time Limit
The student must complete all degree requirements within three years of initial enrollment.

Specialization in Health Psychology
Health psychology is concerned with the psychological variables that influence physical health and illness. The MS program in health psychology offers training in research and theories relevant to health promotion. The program of study consists of core health psychology coursework, research coursework, psychology breadth coursework, and an optional field placement. Current research topics include gender and health, cancer prevention and health education, reproductive health and STD prevention, patient advocacy and self-care behaviors, the effects of stress and mechanisms of coping with it, and child abuse prevention. Research is conducted in the laboratory as well as in clinical settings, and many members of the faculty have strong ties to the Milwaukee community.

Course of Study
The course of study consists of at least 36 credits, distributed as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 955</td>
<td>Seminar in Social Psychology and Health</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 578</td>
<td>Psychology of Race, Ethnicity, and Health</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 754</td>
<td>Proseminar in Biological Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 756</td>
<td>Psychophysiology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 711</td>
<td>Current Topics in Psychology: (health-related topic)</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 833</td>
<td>Neuropsychology</td>
<td>3</td>

<tr>
<td>PSYCH 930</td>
<td>Seminar in Social Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 954</td>
<td>Seminar in Physiological Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 510</td>
<td>Advanced Psychological Statistics</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 610</td>
<td>Experimental Design</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 932</td>
<td>Proseminar in Evaluation Research (or an acceptable equivalent course, as determined by area faculty)</td>
<td>3</td>
</tr>
<tr>
<td>PSYCH 790</td>
<td>Masters Research</td>
<td>6</td>
</tr>
<tr>
<td>PSYCH 812</td>
<td></td>
<td>9</td>
</tr>
</tbody>
</table>

The MS specialty in health psychology emphasizes the application of psychological theories to health-related issues. Although students are exposed to theories and applications in coursework, the field placement option offers a further opportunity to learn by doing. Students are encouraged to take at least 3 credits of PSYCH 812 in their area of interest.

Program Requirements

Advising and the Major Professor
Graduate School and departmental regulations require students to have a major professor to direct their research activities. It is important for students to start their research early in their graduate studies. Admittees are assigned to a major professor they have chosen during the admissions process. Before the end of the second semester, the student must form an advisory committee of three departmental faculty members, including the student’s major professor. Students are free to change their major professor at any time. The Department also provides a Graduate Program Coordinator, who advises about courses and program requirements and who approves programs of study. The Graduate Program Coordinator is also available to help students who wish to change their major professors to find new ones.

Thesis or Project
The student, under the direction of an advisor, has the option of developing either an acceptable thesis based on empirical research or an acceptable project (a review or theoretical paper). In either case, students must demonstrate their ability to formulate a research idea and pursue independent and original investigation. The student must pass an oral examination in defense of the thesis, but no oral examination is required for a project.

Time Limit
The student must complete all requirements within seven years of initial enrollment.
